STATEMENT

The Embassy of the Kingdom of Denmark in Beijing confirms the following to be true:

Coronasmitte.dk is the joint website of the Danish authorities, where individuals and businesses can find current information, advice and knowledge about COVID-19.

According to The Danish State Serum Institute (Statens Serum Institut (SSI)):

- The SARS-CoV-2 RNA analysis, performed at TestCenter Danmark, is accredited by the Danish Accreditation Fund, DANAK, under registration number 397 to testing.
- The laboratory complies with the requirements of DS/EN ISO/IEC Standard 17025:2017 'General requirements for the competence of testing and calibration laboratories'.
- ISO/IEC Standard 17025 and ISO/IEC Standard 15189 are both approved, by the international organization for accreditation bodies, ILAC, for quality assurance of SARS-CoV-2 analyses.
- This concerns testing laboratories TestCenter Danmark, The Danish State Serum Institute (SSI), Artillerivej 5, 2300 Copenhagen and TestCenter Danmark, The Danish State Serum Institute (SSI), Tyge Søndergårdvej 951, 8200 Århus.

This is to certify that all polymerase chain reaction (PCR)-based nucleic tests performed by public laboratories in Denmark comply with the specifications for recognition by the Danish Ministry of Health. Thus, these tests fulfil the Hong Kong Government's requirement to be either ISO 15189-certified or recognized by the Government of the Kingdom of Denmark.
